

Psychological Characteristics of the Influence of Information Threats on the Morality of Youth

Hayitova Hilola Muhammad qizi

Bukhara Region Internal Affairs management Captain's staff

In the world, the destructive ideas and threats expressed as a result of manipulations of various nature from the psychological, spiritual-educational and ideological point of view, are deepening. " The present per day come, more than 20 nuclear weapons in countries work discharge regarding efforts continue doing in the field information threatened with more than 120 of states serious employment save the world from nuclear war, information attack to the point of convulsion from what is being done proves "1, "the Internet distributable computer 49% of their homes are significant to the extent violence and evil to look at ownership, 41% militant (various shootings and to explosions based) home the hero 's goal to grow for violence and evil happened is enough 17% in homes this is the happiness and of the verb the main goal itself is considered ". This about goyavian and information to attacks against the youth information from attacks of protection to himself characteristic socio-psychological characteristics study and improvement, elimination to achieve, to strengthen through psychological immunity of formation socio-psychological factors study current from problems to be in the city.

World education and scientific in the centers information attacks, social of consciousness formation characteristics of the person socialization, goyaviy of the struggle psychological mechanisms of psychological immunity formation social factors in u r dependency problems according to scientific research take It is being done. about the youth various news from threats of protection socio-psychological features, news-psychological to threats against immunity of formation psychological mechanisms and them information for your safety spiritual -educational, ideological in terms of preparation issues research verb issues scientific research verb in the service psychoprophylactic systematic to improve redirected research take to go necessity is being monitored.

In the new Uzbekistan, " Our Youth " to the mind negative impact the one who makes them goyavian to take care of redirected to the movements against effective struggle take to go also, strong-willed, selfless, patriotic and independent in my opinion owner generation upbringing according to practical measures programs work exit ", "... them patriotism feeling, tolerance, laws, national and universal to the values respect in spirit, harmful effects and to the governors able to withstand life dirty definitely confidence and to the views owner person as education, terrorism and religious extremism, separatism, fundamentalism, violence and cruelty in his thoughts It is necessary to take protection legal and normative basics creation present the problem scientific research to do Takazo will do.

Uzbekistan No. PF-60 dated January 28, 2022 "On the Action Strategy of New Uzbekistan for 2022-2026", No. PF-5938 dated February 2, 2020 "On measures to improve the socio-spiritual environment in society, further strengthen the mahalla institution, and bring the system of working with families and women to a new level", No. PF-6017 dated June 30, 2020 "On measures to radically reform and bring the state youth policy in the Republic of Uzbekistan to a new level", No. PF-3907 dated August 14, 2018 "On the system of spiritual, moral and physical upbringing of young people, This dissertation work serves to a certain extent in the implementation of the wide-ranging tasks and measures established within the framework of the Decrees and other regulatory documents "On measures to raise the quality of education to a new level".

Independent States X a md countries from researchers G.M. Andreeva, Yu.E. Aleshina, A.I. Antonov, N. N. Bogomolova, S. I. Golod, O. A. Karabanova, N. N. Obozov, B. D. Parigin, E. V. Shorohoya and others in their research news threats and them ahead to take separate socio-psychological issues scientific research is covered.

Current dangerous internet network in the age through distributed biased information, various destructive ideas, manners destructive disgusting defects every one conscious person to worry insertion sure. Next times with the internet garden hacks, global from the network ugly on purpose those using increasingly is going As a result, to the error introductory electronic publications and videos wide is spreading.

Galamis who the youth own to their traps in the mood from the internet craftsmanship with is using Themselves « close friend " or " guide as an inviter introducing young people correct out of the way In fact, they are misleading about religion and Sharia. generally sciences no, just crowd from the beginning memorize what they got from repetition further they don't pass. Other from the side than, they are this ignorance with others to the edge of the cliff pulling and someone's to the drum playing they don't know Such first religion, religion, worship, heaven about various attractive the words talking, cave the youth out of the way beat, in the end, satisfaction to the victim is rotating.

From the Internet taken thing correct, reliable and harmless that to know need. Good or bad to the difference not gone young people through the Internet distributed every what information truth because reception what is doing serious to worry it will be fine.

Islamic teachings strongly condemn corruption, sowing seeds of fear, hostility, and sedition in people's hearts. As is known, the last in years religion to themselves mask as received streams, categories appearance it happened They are malicious goals on the way in society mischief, innocent people blood unfair spill like crimes peak citizens peace break, people between conflict to take out movement are doing.

A person entering the boundless world of the Internet should always remember that time and life are precious. Because it is global network endless to the regions owner is, then human lost hours and days ineffective passing sending possible.

In today's era of intense globalization, effective and reliable protection of the consciousness of young people from harmful ideas and influences coming through the Internet is becoming more and more important. This and teachers, spirituality promoters, from parents further alert and alert to be young generation ideological-ideological immunity reinforcement regarding works scale further expansion demand does. To us It is known that many sites and networks big funds in return filtered placed and this the situation many in countries observation can Of course, prohibitions or filter media through people in the Internet world various of forces dangerous unnecessary threats and negative from information to keep dress and only temporary situation to be can We must always be on guard against any actions aimed at capturing the minds of our youth, attacking our national interests, attacking our spirituality, and

destroying our historical memory, which is the meaning of our lives. That's it us nobody, no one thing own chosen out of our way back again can't and we intended glorious for our purposes of course We will reach.

To our country in a crowd culture mainly the internet network through enter It is coming. state manners, national and religious to values respect decrease like many troubles bringing is coming out. Of young people shamelessly clothes, bodies picture drawing, ear and their noses piercing and wearing "zirak". they get it, girl children's son for children like dressing such as "fashionable" elements right through the internet spreading exactly.

Ideological traps on the Internet are also dangerous because they resemble culture and appeal to young people. Human in morality negative in a crowd culture separate youth to the mind dust solib, spirituality to the delight of in rotation. It's a pity, because of the influence of this "culture". given the rest or his/her to the victim that is spinning often youth themselves doesn't feel.

The minds of young people are being poisoned as a result of "unfiltered" reception of messages from the global information system. For example, someone necessary information to take for the purpose of to the site entered of young people famous person to destruction met "is sensational to the announcement eye falls and involuntarily him/her opens. There and again a site will open and then deceiver of the news continuation reads In this way cave youth of the world into the trap hangs. Such to the influence of disgusting "culture". given teenager indifferent to life light-hearted looking after the development of the country and people to peace indifferent someone as grows up. Also, the crowd culture into the trap hung children human wanted his work can do maybe knows, that is passed to the mankurt around Another of the biggest threats that social media poses to the stability of families and society is that many peaceful families are being destroyed due to the conversations they generate.

Every parent who wants a bright future for their child should pay serious attention to the issue of upbringing. Let the child receive his upbringing not from various computer games, the Internet and social networks, but first of all from his parents, grandparents, good books that call for goodness, purity and religion. In the era of globalization, when great struggles are taking place for the hearts and minds of people, it is an urgent task to increase attention to the upbringing of high spirituality, decency and morality. It consists in raising the growing younger generation on the basis of religious and national values, strengthening in their hearts a sense of love and loyalty to their people and Motherland, warning them of information attacks by various destructive forces, and providing them with adequate protection.
